PROFESSIONAL SUMMARY

Senior Data Analyst and Analytics Engineer with 5+ years delivering high-impact data products across financial services and federal consulting. Proven track record building ETL pipelines, BI dashboards, and analytical models that drive executive decisions and quantifiable business results — including \$800K in annualized cost recovery, 75% pipeline acceleration, and 17% improvement in data accuracy. Fully authorized to work in Germany without sponsorship.

WORK EXPERIENCE

12/2024 – 09/2025

Lead Data Analyst ↑ Promoted

Capital One · McLean, VA, USA

- Identified a critical legacy code error **overpaying associates by \$800K annually; corrected and eliminated entirely.**
- Re-engineered the segmentation pipeline, **cutting execution time by 75% and eliminating third-party platform dependency.**
- Defined and championed the data product roadmap across Snowflake and Databricks, aligning engineering, product, and business teams across 20+ data products.
- Mentored junior analysts and led workshops establishing peer review standards that improved output quality across the team.

10/2023 – 11/2024

Senior Data Analyst

Capital One · McLean, VA, USA

- Identified an additional **12% of high-value customers in the acquisition pool** by analyzing eligibility under relaxed policy scenarios, directly expanding addressable market.
- Improved **customer entity resolution mapping by 17%** through SQL optimization, strengthening the foundation for downstream analytics.
- Cut infrastructure analysis time for Visa and Mastercard interchange negotiations from 12 hours to 3 via SQL optimization.
- Built and maintained ETL pipelines across 20+ data products on Snowflake and dbt, serving 50+ field acquisition and marketing partners.

12/2021 – 10/2023

Senior Business Intelligence Analyst

DMI · Washington, D.C., USA

- Built and maintained **20+ Power BI and Tableau dashboards for federal clients including the CFPB**, managing requirements end-to-end from scoping to delivery.
- Automated Tableau Server governance workflows using Python, recovering approximately 8 hours of manual effort per week.
- Conducted SQL-driven statistical analysis on engagement survey data, delivering findings that informed leadership resource and budget decisions.

05/2020 – 12/2021

Analytics Consultant

Guidehouse · Washington, D.C., USA

- Conducted cost-benefit analysis on payment platform adoption, **revealing costs 3x the original bid — directly informing the decision not to proceed.**
- Built a production-grade R ETL pipeline for automated vulnerability reporting at DHS CISA, eliminating manual reporting overhead entirely.

EDUCATION

2019 – 2020

M.S. Business Analytics

University of Virginia · Charlottesville, VA, USA

2010 – 2015

B.S. Chemical Engineering

North Carolina State University · Raleigh, NC, USA
